**Sky-high performance.
Down-to-earth cost.**

Eagle clears the air on what it takes to buy a computer.

Forget the heavy price you thought you'd have to pay for a top-rated computer or word processor. Nobody - but nobody - gives you more for the money than Eagle.

The era of unnecessary cost and confusion is over, once and for all.

Eagle Power: a complete package.

A self-contained system that is fully functional with no expensive "standard options" to buy later. Just plug it in, flip the switch, and you're in business.

You get word processing software that speeds letters, reports, mailing lists. And stores them for easy recall.

You get financial planning software, an "electronic worksheet" with full "what if" capabilities.

You get the CRASIC™ programming language that lets you create custom software for your special business needs.

You get the C/P/M™ operating system that allows you to choose

from the largest selections of software available today. And Eagle offers both flexible disk storage and integrated or add-on hard disk storage.
