Page Pro Pics

A Series of Pictures for use with Page Pro 99

Introduction:

Page Pro Pics is a series of disks for use with the Page Pro 99 page-making program, by Asgard Software. Of course, you need this program to utilize these disks. Each volume in this series consists of many individual pictures of a given theme. These pictures were chosen from dozens, and in some cases hundreds of pictures - only the best were selected.

This documentation is for all of the volumes in this series. Consult the individual sheet that comes with this volume for a list of the individual pictures, their filenames, and samples of each.

Using Page Pro Pics:

Before doing anything with the pictures on your *Page Pro Pics* disk(s), plan the page you are going to create. Then review the sheet that came with this volume and choose the picture or pictures that you wish to use. Write down their filenames and then load a disk manager.

Next, initialize a disk with the disk manager program and copy the pictures you are going to use on your page onto the blank "work" disk. On this disk you will be placing the page you create. You may also want to put copies on this disk of any fonts you intend to use , as well as any text files you are going to import in. If you haven't created your text files yet, and you are planning to import one in, load your word processor, create your text file and save it to this disk.

Next, load *Page Pro 99* as described in the manual that came with it. Place your work disk in drive one, or another drive if you have a multi-drive system. Load in your fonts, if any first, and then import in your text file (the import function erases the entire page, and hence the text file should be loaded in first). Or, type in your text.

When you get to a point in the page where you want to have a picture, place the cursor at the upper left hand corner of where you want it, and press **FCTN-L**. Then enter the disk filename of the picture, press **ENTER**, and the picture will be loaded. When you are finished creating your page and placing your pictures, save your page to the work disk and/or print it out.

Note that when loading in your page later it will look to the disk drive that contained your work disk when the page was created for the pictures on that page. It is for this reason we suggest that you designate a drive as the one that will always hold your work disk. Then you'll know that you should always put your work disk in, say, drive two (or drive one, or whichever drive you want).

Disclaimer:

Asgard Software, the sole manufacturer and distributor of this program, hereafter referred to as "the product", does not guarantee that this program will be free from error, perform as stated in this manual, or meet the needs or expectations of the user.

Asgard Software is not liable for the use or misuse of this product or any damage that is the result of the improper or proper use thereof - not limited to the proscribed or actual function of the product. Asgard Software warrantees the part of the product consisting of the diskette for a period not to exceed 90 days from the date of purchase, provided this part is not damaged by improper use, accident, intentional actions, or from any condition not arising from the quality of the original materials or craftsmanship. Asgard Software reserves the right to reject for service any returned materials.

Asgard Software will service free of charge any product that meets these conditions within 90 days of purchase, and for the cost of return postage after 90 days up to the lifetime of the product.

This product is provided unprotected so that users can legally create copies for their own use. This is not a license to distribute this product. This product is copyrighted in the manner described in this manual, and may not be reproduced by any means for the use of others. In transferring ownership of this software all copies must by similarly transferred in the same transaction. Ownership of this product carries the responsibility to control its use and distribution, and users will be liable to any damage

incurred to Asgard Software that may be caused by not carrying out this responsibility.
