

TI-99 - THE 'XLS' EXPLAINED

v1.19c - 25.12.2017

25.12.17: - please see hints for the “ready lists/filters” inside “CAT.4”, (last page)

- RED TEXT** - an information I am not sure about, and still has to be confirmed!
- PINK TEXT** - the Information is confirmed by somebody, as there were doubts before
- BLACK TEXT** - standard information
- BETA** - in most cases means that there is a idea (or tactic) to enter the wanted data, as shown here, but that this data is not entered yet.
- DSK & DL** - DISK means: a product that was sold, released
- DSK means: “private” product, almost never sold on a real floppy
DSK leads to DL: available via DownLoad (somewhere ☺)
and: DSK leads to NO RARITY (as it is no buyable/collectable realiron product)

- some screenshots were made on Excel 2003, some on 2010 ☺

- please NEVER sort (& save) the list by Columns
(not all entries are in alphabetically order by nature.....)

i.e. to see just PEB-Cards, filter the **CAT1** for "PEBC" (or just "SIDE" for SideCar, a.s.o)
Just have a look which **CAT1**'s exists. Same for **CAT2**'s, and they are "combined" with sense, for cool filtering :) -> /EDIT/ and **CAT3** today for more ☺

There is a new CAT3 now, for genres and alike.

For example, here you can filter 1.st the CAT3 for “Space” (overall, almost games) and 2.nd maybe the CAT1 for “Carts” or “Disk”

To find cartridges with a special chip-size, just do this:

(Mostly please do not filter just for "16K", as there are also entries like "16K/80COL" which could not be found then. I recommend to use the user-defined "contains"-filter as shown here below, to get 100% hits. This is valid for ALL filters here, as this is my way to prevent from too many columns in the XLS ☺

After that, you could filter for „DISK“ or „CS1“ (=Cassette-Releases) in the CAT1-column, only to get the tapes ☺

MBX:

IF YOU ARE CONTRIBUTOR TO THIS LIST:

My request for you while entering / changing data inside your work-copy of the XLS:

Enter your data in a non-used text-color (or background-color)

+ IMPORTANT:

Please find the column "Editor" (where I log changes)

If you ADD OR CHANGE **any** row or information,

nn the row "Editor", please **enter YOUR personal tag like "YOURNAME02"** or similar.

So I can quickly find ALL changes/adds by filtering this row, with one click only ☺

Don't use "YOURNAME01", if I used it before (Informations you gave me before)

Please do not re-sort the XLS, there would be alphabetically issues.

If questions, pls ask. If present, please see the other tabs in the XLS.

Also a nice (new) thing is filtering CAT1 for "books" or "doc" or "manual". This is my latest work (unpublished yet) :) I think almost all 99-related books a.s.o. can be found there

Sometimes you can find a category twice. I.e. "Tool" in CAT2 and CAT3. I know about, these are things that have to be solved later. Maybe with a CAT4, but I want to prevent from too many columns, as I wrote before.

Misc:

All BOOKS are in an own section,

all MANUALSs are placed directly following after the concerning cartridge, tape or disk,

and the DOCs also have a small own section, at the end of the table.

APPENDIX F: FILTERS 14.11.2017:

Magic CAT.x-filters / examples that I worked on in the past:

CAT.1 : (= Hardware/Media-Type)

"HEX" for all HexBus related

CAT.2 : (= HW/SW-Classification)

"DEVL" for developers stuff

CAT.3 : (= HW/SW-Genre)

"EPROM" all Eprom-based stuff

"GRAM" and/or "GROM" (or "RAM"+"ROM" for all)

CAT.4 : (= Compability, Capability, Requirements, Housing,)

CAT.4 has the following integrated "ready lists/filters" (seen here as requirements):

"Artist"

"Speech" (Not Speech-Synthe usw, Specials only)

(for "Speech"-Hard- and Software filter CAT.3)

"PCode"

"ADV" (for "Adventure-Cart needed")

"Doom" (for "Doom-Cart needed")

"AMS" (for all AMS/SAMS related)

"HRD" (=all RamDisk related)

"Mouse"

"MULTI" or "SUPER" for the cartridges

"Midi"

"BATT" for devices using battery

"9640" for all Geneve related

dito "99/2" "99/4" "99/8" "CC40" "Tomy"

"110V" for all 100-115-117-120 Volts

"220V" for all 220-240 Volts (both just changed today, so you don't have that) 14.11.2017

"MM" MiniMem related

filter the **last column** (comments) for devices using "CLOCK" or "CRU"
(and to get the standard CRUs, if given) ;)

...to be continued ☺

have fun

Schmitzi
